## Glazier Medical Centre

Thank you for your interest in medical practice opportunities at the Glazier Medical Centre. The physicians at our mixed family/ multi-specialty group have been providing care to Oshawa and the Durham region for over thirty

years. Currently we have over twenty partners and associates.

Our recently renovated building is a pleasure to work in. Our moderate size allows easy interaction with other physicians and ready consultation with specialists. Flexible work hours, a busy urgent care, a very congenial physician group and an excellent management team make for a varied and enjoyable medical environment.

Our "Medifile" computerized medical records system will simplify your medical record keeping immensely and make short work of time consuming paperwork. We are one of the few offices that truly are paperless in our record keeping. Desktop access to Lakeridge Health, our local hospital, is quick and easy. For those days when you are unable to complete your review of lab and x-ray results at the office, access from your home over the internet is available.

In addition to our physician complement, our patients also benefit from our onsite radiology, ultrasound, physiotherapy and chiropractic, plus optometry, pharmacy and dental offices.

Dr. E. McLelland  
Medical Director
